

PUBLIC NOTICE

Beginning May 1, 2023, 160th Avenue from Sheridan Parkway east to NP Flex 1 industrial building will be closed for street improvements with local access only from Huron Street west. This street closure will also affect the Sheridan Parkway and 160th Avenue intersection reducing north and south bound lanes to one lane each way. Street improvements entail the widening of 160th Avenue to include an additional turn lane and bike lanes from the Flex Industrial building to Sheridan Parkway. Sheridan Parkway improvements include the widening to match the final alignment of four lanes.

Alternate routes are advised. Detour for 160th Avenue will be Huron Street north to Highway 7, or alternatively Sheridan Parkway north to Highway 7.

Update: Due to inordinate wet weather in the months of May and June, the reopening date is reforecast to the end of October 2023 (from the original date of September 2023). While reopening is projected in that month, roadway work will continue on both Sheridan Parkway and 160th Avenue (final traffic signal installation, further paving and utility work) through late Spring of 2024.
